

Notes on Nice radio receiver BIDI-AWNING

General guide

Before connecting and commissioning the system, it is essential to read and observe the following safety instructions:

- The on-site electrical installation is to be carried out by licensed electricians
- Electrical connections must be made in such a way that they remain accessible and disconnectable at all times
- The Nice BIDI-AWNING instructions must be followed
- Refer to the document ANSL032 "Connection diagram adapter Movenso-Somfy radio"
- All installation and assembly instructions must be followed
- Nice transmitters type ERA (STOBAG type SKIMY SRCH-X...) equipped with a prog. button must be used; older models e.g. type ERGO must be replaced (not compatible with BIDI-AWNING)
- Only Somfy Orea WT drives with BIDI-AWNING are used
- A calibration of the limit positions must be carried out; procedure according to instructions
- Optionally, more comprehensive instructions for BIDI-AWNING can be viewed in the STOBAG downloads or via QR code on the packaging
- After commissioning, a complete function check of the sensors etc. must be carried out
- In case of strong wind and storm, the plant must be put out of operation (WWK according to CE conformity)
