PLANNING CHECKLIST

-
- Specialist partner consulting.

Let your STOBAG specialist partner advise you. They have the experience, know the local requirements (specific tions of the municipality) and can advise you and coordinate the other trades if required.

For example, ground foundations, electrical supply lines, house connections, plumbers, landscapers.
 - Competent building authority.

Ask the relevant building authority in your municipality whether a building permit is required. Get a copy of the decision in writing. In many areas, a simplified buildin application is suffici t. The forms are usually available online.
 - Early planning.

Start your project at the right time. If necessary, submit the documented building application well before the planned start of construction.
 - Thorough preparation.

The better prepared and documented you are, the faster the project will be processed by your building authority.
